DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed December 3, 2004, with respect to the Non-Final Rejection have been fully considered and are persuasive. The rejection of Claims 1-26 based on the Kirsten (US 5,724,475) reference has been withdrawn.

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Kirsten et al. fail to specifically teach capturing the video frames at a still picture capture rate that is less than the input frame rate, providing the captured video frames to a video compressor at the input frame rate, where an already captured video frame is repeatedly provided to the video compressor at the input frame rate until a new frame is captured and finally transmitting the captured video frames after compression by the video compressor at a still picture repetition rate that is no less than the capture rate. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
